TO WHOM IT MAY CONCERN

As physiotherapist, I like that my patients feel relax and that they enjoy a nice ambience. A room filled with clean and refreshed air is more relaxing and welcoming to the clients.

Been introduced to BREATHE air purifier, I tried it and I invested in the product and used it in my private practice.

I use either the essential oil alone or in mixture depending the mood of the day. My clients seem to be happy and agree that the air feels more refreshed and clean.

I also use it at home for my own consumption.

The product is good and I can recommend it
